Demonstrated expertise in complex database management reporting, data visualization and effective communication for finding insights and optimizing profitability. Possess excellent analytical skills, Strong attention to details, and important ability to work and perform well in fast-paced business environments.

EXPERIENCE

Data Analyst

Kido Enterprises Pvt Ltd.

05/2023 - Present Bangalore, India

- Transformed data into actionable insights, furnishing C-suite stakeholders with strategic recommendations to optimize business operations and enhance customer experience.
- Generated statistical reports, visualizations, and dashboards that provided valuable insights for tracking progress towards product objectives, spanning customer retention, brand awareness, and business expansion.
- Collected, cleansed, and analyzed extensive datasets to discern trends, patterns, and valuable insights.
- Teamed up with senior leadership to devise and implement cutting-edge digital marketing strategies, successfully introducing innovative tactics that resulted in a 30% upswing in sales and an impressive 150% boost in revenue generated from the Leads Generation Campaign.

Data Analyst Intern

Trainity

11/2022 - 04/2023

Vishal-Tyagii/Trainity (github.com)

- Reviewed the provided dataset, addressed problem statements, and generated comprehensive reports. Presented insightful dashboards and charts to convey key findings.
- Collaborated closely with a team of data engineers and BI analysts to actively contribute to the extraction of insights from data. This entailed formulating complex SQL queries and subsequently converting them into user-friendly dashboards.

EDUCATION

Post Graduate Program on Advanced Data Science and Machine Learning

National Institute of Information Technology (NIIT) – Stack Route

03/2022 - 03/2023

Bachelors in Computer Application

Institute of Technology and Science

2019 - 2022

Percent

65.5 / 100

TECH STACK

Python	SQL	Tableau	Java
Power BI	Excel	Numpy	Pandas
DBMS	Seaborn	MySQL	

Machine Learning

Data Preprocessing	Creating Reports

Exploratory Data Analysis (EDA)

PROJECTS

Airbnb Home Rental Analysis:

Conduct exploratory data analysis (EDA) utilizing Python, Excel, and Tableau. Analyze trends and forecast future sales using the SARIMAX model. Leveraging Airbnb data, the system offers recommendations for the most suitable hotel type based on customer preferences.

Spark Funds (Asset Management Company):

Led an end-to-end project to identify investment opportunities for Spark Funds investors across various funding types. Implemented a Streamlit-based classification model for deployment.

STRENGTHS

Certified Data Analyst

Achieved certification in Data Science and Machine Learning.

Hard-working

Engaged in various projects within the analyst domain, encompassing industrial projects as well.

Solving complex problems

As a result of extensive hands-on experience with technical tools such as Python and SQL.
